

CSE 335s: Operating Systems

Memory Management Assignment

**In the report, you should show screenshots of the code and a brief explanation of it.
You should attach snapshots of the following 2 test cases.**

Run the following scenario once using first-fit and once using best-fit, and attach a snapshot of memory layout and segment tables after each operation:

Initial Memory Setup (all units are in K)

Total Memory Size: 1000

Initial Holes:

H1: Start = 0, Size = 300

H2: Start = 400, Size = 250

H3: Start = 700, Size = 200

Operation: Allocation

Process: P1

Segments:

Code = 100

Data = 120

Stack = 90

Operation: Allocation

Process: P2

Segments:

Code = 200

Data = 40

Operation: Allocation

Process: P3

Segments:

Code = 120

Data = 50

Operation: De-allocation

Process: P1

Operation: Allocation

Process: P4

Segments:

Code = 230

Data = 40

End of Assignment
